*Introducing PathIQ, Amirsys' decision support suite for pathology.*

ExpertPath gives you online access to expert-based decision support, so you can select the appropriate tests and make the right diagnosis with confidence. Rely on expert guidance through thousands of diagnoses, image examples, expert-selected differentials, and suggested ancillary tests to help you consider every possibility while saving time and costs.

ImmunoQuery, based on more than 1,000,000 cases, is the definitive expert and evidence-based decision support system for immunohistochemistry. Whether you need a list of antibodies that will confirm your diagnosis or suggestions for diagnoses that have a similar staining, ImmunoQuery helps you discover the correct diagnosis.

# **2013 ASCO/CAP HER2 Testing in Breast Cancer Guideline Updates: Implications for the Multidisciplinary Breast Cancer Team**

Presented by:

**Dr David Hicks**

*Director of Surgical Pathology, University of Rochester Medical Center*

Learning objectives:

- Understand the importance of multidisciplinary collaboration to enhance HER2 testing quality in breast cancer
- Review the clinical implications of breast cancer prognostic markers (eg, ER, PgR, HER2) in guiding appropriate therapy
- Review the 2013 ASCO/CAP HER2 Testing in Breast Cancer Guideline updates
- Identify the pre-analytic variables that influence HER2 testing quality in breast cancer
- Identify when HER2 retesting in breast cancer is recommended

Program date and location:

**Thursday, July 10, 2014, 4:30 PM to 5:30 PM**

**Seaport Boston Hotel, Back Bay Complex**

**Reception - 4:00 PM to 6:00 PM**

Hosted by:

**Genentech, Inc.**

This Partnership Workshop is not a part of the official APC Educational Program at the 2014 Annual Meeting and is not sponsored by the APC. The APC does not officially endorse any company or its products and does not award CME credits for attendance at Partnership Workshops.

### DIAMOND Partner Descriptions

#### **American Society for Clinical Pathology (Booth #1)**

Founded in 1922, ASCP is the world's largest professional society representing the entire laboratory team. ASCP's more than 100,000 members include board-certified anatomic and clinical pathologists, pathology residents, pathologists' assistants, clinical scientists, and certified laboratory professionals. Excellence in education, certification, and advocacy on behalf of patients, pathologists, and laboratory professionals is the mission of ASCP. For more information visit: [www.ascp.org](http://www.ascp.org).

#### **College of American Pathologists (Booth #2)**

The College of American Pathologists (CAP) serves patients, pathologists, and the public by advocating excellence in the practice of pathology and laboratory medicine worldwide. With more than 18,000 physician members, the CAP has led laboratory accreditation for more than 50 years with more than 7,500 CAP-accredited laboratories in 50 countries. For more information visit: [www.cap.org](http://www.cap.org).

### PLATINUM Partner Descriptions

#### **Genentech (Booth #5)**

Founded more than 35 years ago, Genentech is a leading biotechnology company that discovers, develops, manufactures and commercializes medicines to treat patients with serious or life-threatening medical conditions. The company, a member of the Roche Group, has headquarters in South San Francisco, California. For more information visit: [www.gene.com](http://www.gene.com).

#### **Path IQ (Booth #3)**

PathIQ is Amirsys' suite of online diagnostic decision support products for pathologists: ImmunoQuery and ExpertPath. ImmunoQuery, based on over 1,000,000 cases, is the definitive expert and evidence based diagnostic decision support system for immunohistochemistry. ExpertPath provides comprehensive, expert based diagnostic decision support, so pathologists can select the appropriate tests; save costs and time; and make the right diagnosis with confidence. For more information visit: [www.pathiq.com](http://www.pathiq.com).

### GOLD Partner Descriptions

#### **Corista (Booth #9)**

Corista's image-centric digital pathology platform provides a complete environment for local and remote doctors to deliver better patient care, faster. Integrating images from any WSI scanner, the platform combines the essential elements for comprehensive pathology workflow, including synchronous and asynchronous collaboration, report templates for customizing synoptic reports and diagnostic reports for referring physicians, and LIS integration. From any location, using any WSI, to any web-enabled device. For more information visit: [www.corista.com](http://www.corista.com).

#### **Kellison & Company (Booth #7)**

Since 1976, the principals of Kellison & Company have specialized in providing comprehensive revenue cycle management services to Pathology practices including outreach, hospital-based AP practices, molecular labs and

clinical professional component practices. Kellison's goal is to help improve cash flow, reduce administrative costs and enhance patient satisfaction. The company provides credentialing services, turning around denials and reporting options to help you monitor your current financial status, as well as to predict future trends. For more information visit: [www.kellison.com](http://www.kellison.com).

### **Leica Biosystems – Aperio ePathology (Booth #6)**

Aperio ePathology solutions from Leica Biosystems equip pathologists with the power to evaluate, engage and excel like never before. Our network solutions enable remote, simultaneous, real-time viewing and distribution of eSlides for consults and collaboration, while our precision solutions empower pathologists with advanced image analysis capabilities. For more information visit [www.leicabiosystems.com/Aperio/](http://www.leicabiosystems.com/Aperio/) or email: [aperio@leicabiosystems.com](mailto:aperio@leicabiosystems.com).

### **NetSoft Inc. (Booth #4)**

If you are looking for an Anatomic Pathology management system that molds itself around your workflow and does not lock you into a computer design that was an afterthought rather than a streamlined software product created specifically for pathologists and the pathology laboratory, why haven't you looked at IntelliPath? IntelliPath, created by NetSoft, is the result of a large number of professionals who work in the pathology laboratory. NetSoft believes that each idea is a real possibility not just a thought that gets placed in the "things to do queue" that never gets done. Features are only part of the issue when considering which software system to implement, SERVICE should be equally considered. Take some time and visit us at Booth #4 and we will show you the difference. For more information visit: [www.netsoftusa.com](http://www.netsoftusa.com).

### **The American Society for Investigative Pathology/The American Journal of Pathology (Booth #8)**

The mission of The American Society for Investigative Pathology (ASIP) is to promote the discovery, advancement, and dissemination of knowledge in experimental pathology and related disciplines. This shall be achieved by fostering investigation into the pathogenesis, classification, diagnosis, and manifestations of disease through meetings, publications, and educational activities. The Society is the owner of *The American Journal of Pathology* (AJP). AJP is the leading global forum for reporting research on cellular and molecular mechanisms of disease publishing high-quality, original papers on the cellular and molecular biology of disease. For more information visit: [www.asip.org](http://www.asip.org).

## **Exhibitor Descriptions**

### **Affymetrix, Inc. (Booth #12)**

Affymetrix's tools for cancer research enable whole-genome analysis through single-gene validation across diverse sample types including FFPE. Our solutions for expression, miRNA, genotyping, flow cytometry, and molecular biology reagents provide an integrated view of the gene -protein -cell, for faster translation of discoveries to treatments. For more information visit: [www.affymetrix.com](http://www.affymetrix.com).

### **American Pathology Foundation (Booth #19)**

The American Pathology Foundation (APF) is a professional society devoted to the business of pathology. Founded in 1959, the Foundation focuses on providing quality educational programs and management resources for members to help them stay current with scientific, regulatory, and marketplace developments affecting the practice of pathology. APF membership is inclusive of pathologists, practice managers, pathology residents and academic programs. For more information visit: [www.apfconnect.org](http://www.apfconnect.org).

### **ARUP Laboratories (Booth #18)**

ARUP Laboratories is a leading national reference laboratory and a nonprofit enterprise of the University of Utah and its Department of Pathology. ARUP offers more than 3,000 tests and test combinations, ranging from routine screening tests to esoteric molecular and genetic assays. ARUP serves clients across the United States. For more information visit: [www.aruplab.com](http://www.aruplab.com).

### **GRM Document Management (Booth #17)**

With over 25 years of experience, GRM Document Management is a leading provider of lifecycle records and information management solutions. The company continues to demonstrate technological leadership by bringing proprietary innovation and new levels of cost efficiency to records storage, digital document management, data protection and certified destruction. For more information visit: [www.grmdocumentmanagement.com](http://www.grmdocumentmanagement.com).

### **Lippincott Williams & Wilkins/ Wolters Kluwer Health (Booth #16)**

Lippincott Williams & Wilkins, a Wolters Kluwer Health company, is a leading international publisher of medical books, journals, and electronic media. We proudly offer specialized publications and software for physicians, nurses, students and clinicians. Please visit our booth to browse our comprehensive product line. For more information visit: [www.lww.com](http://www.lww.com).

### **McKesson Business Performance Services (Booth #15)**

McKesson Business Performance Services is an experienced provider of healthcare management, medical billing and technology services for academic medical centers, hospitals, health systems, and physicians nationwide. We offer a comprehensive portfolio of revenue cycle solutions, practice management services, and advanced technology to help our clients achieve better business health. For more information visit: [www.mckesson.com](http://www.mckesson.com).

### **Sakura Finetek USA, Inc. (Booth #10)**

VisionTek is the only digital imaging system that pathologists can use like a conventional microscope to view live up to 4 slides simultaneously or to view live multiple areas of the same slide at different magnifications. Easy operations include overview caption of 4 slides in 17 seconds, mouse-controlled ROI selection, Z-stacking and magnifications from 2.5x to 40x. Precise high quality images and quick response to remote control make VisionTek the ideal live slide review system for intra-operative remote viewing of frozen sections, onsite evaluation of fine needle aspirations (FNA) and second opinion consultations. For more information visit: [www.sakura-america.com](http://www.sakura-america.com).

### **Vachette Pathology (Booth #11)**

How are you handling the budget cuts to your department? What changes are you making to maintain profitability? Universities are making some hard choices. Perhaps we can help. Why not work with a consulting firm to look at your revenue side? Maybe we have an answer for you. For more information call 1-866-407-0763 or visit [www.vachettepathology.com](http://www.vachettepathology.com).

### **Views IQ (Booth #13)**

ViewsIQ's innovation, Panoptiq™, is an interactive digital slide imaging system that adapts to your existing microscopy setup which allows users to stitch multiple fields of view into a single panoramic image at any objective, ranging from 2x to 100x. This provides a unique opportunity for educators to enrich the student experience by embedding an interactive learning technology into their curriculums.

For more information visit: [www.viewsiq.com](http://www.viewsiq.com)

### **Voicebrook, Inc. (Booth #14)**

Voicebrook is the leading provider of speech recognition and digital dictation solutions in Pathology. VoiceOver® software integrates directly with all major Anatomic Pathology systems and has been widely deployed throughout the US and Canada. Voicebrook's software and services extend beyond core Dragon Medical® solutions and ensure the highest levels of success with speech recognition, while also providing the flexibility for users to choose between front-end speech recognition or traditional transcription workflows. VoiceOver® can be deployed as an upgrade to a Dragon implementation, allowing sites to protect initial investments, and realize the full potential of speech recognition and complementary workflow technologies.

Skyline Room, Plaza Level, Seaport World Trade Center

*Andrew Beck, MD, PhD; Lauren Briere, MS, CGC; Richard Haspel, MD, PhD, Beth Israel Deaconess Medical Center*

Next-generation sequencing methods and multi-gene panels have entered clinical practice. Pathologists, as directors of molecular pathology laboratories, are already playing a leading role in applying genomic technology to patient care. Recognizing the need to train pathology residents in genomic medicine, the Training Residents in Genomics (TRIG) Working Group was established in 2010. This PRODS Working Group is made up of experts in molecular pathology, medical education, and genetic counseling. With educational design support from the American Society for Clinical Pathology (ASCP), the TRIG Working Group developed and implemented well-received day-long workshops for pathology residents at the ASCP and United States and Canadian Academy of Pathology annual meetings. A train-the-trainer guide is now being developed to allow residency programs to locally implement this workshop.

This Genomic Pathology Workshop at the APC Annual Meeting will be an abbreviated form of the day-long version developed for residents. Using a case-based, interactive small-group approach, workshop participants will learn principles related to the development of genomic assays and interpretation of results. The workshop will also include practical hands-on instruction with the use of online genomic pathology tools. As such, we ask participants to bring a tablet or laptop (preferred).

We hope this workshop will give PRODS and APC members an opportunity to better understand the tools created by the TRIG Working Group and the potential utility of implementing a similar workshop at their institutions with the help of the train-the-trainer guide.

## Association of Pathology Chairs 2014 Annual Meeting

July 8-11, 2014

Seaport Boston Hotel & World Trade Center, Boston, Massachusetts

3:00 pm - 5:30 pm

**Workshop #2: Methods for Effective Teaching of Laboratory Management  
(Co-sponsored by the American Society for Clinical Pathology and the  
American Pathology Foundation. Audio-visual support for this session is  
sponsored by the Academic Mission Group Fund of the Association of  
Pathology Chairs.)**

Cityview Ballroom I, Plaza Level, Seaport World Trade Center

Results of a survey of members of the PRODS Section of the Association of Pathology Chairs were presented during a workshop at the 2009 APC Annual Meeting and concluded there was extreme variability in the teaching of laboratory management to residents due to a number of factors, such as lack of faculty time, a lack of resident interest, and a lack of faculty interest. As a result of the workshop, a Laboratory Management Curriculum Development Workgroup was formed and a laboratory curriculum was published in 2011 in the *American Journal of Clinical Pathology*.

Additionally, a set of 27 milestones for Pathology residency training has been drafted by a Pathology Milestones Workgroup of the ACGME. These milestones are a tool for residency program directors, faculty and residents. They not only shape residency training, but provide ongoing documentation of achieving desired outcomes of a competent practicing pathologist. Pathology core and subspecialty milestones will be implemented on July 1, 2014.

Finally, expectations for the new pathologist in practice have been outlined (Horowitz, RE, APC 2012 Annual Meeting) and include: communication skills, interpersonal skills, practice management, professional skills, leadership and teaching skills and laboratory direction. The experience of the pathologist in these areas varies by practice settings and there is a recognition that management training needs to be individualized both in content and timing.

This pre-meeting workshop is designed to provide participants with information, resources and tools to assist them in teaching laboratory management to residents. Sharing of practices will highlight various approaches to teaching this aspect of the residency curriculum including examples of how Pathology residency programs are addressing the ACGME Pathology milestones.

## Association of Pathology Chairs 2014 Annual Meeting

July 8-11, 2014

Seaport Boston Hotel & World Trade Center, Boston, Massachusetts

### Academic Pathology by 2020 – Where Are We Headed and How Do We Get There Together?

At the last three APC annual meetings, we examined in detail the impact of genomics and personalized medicine (in 2011), health information technology and clinical informatics (in 2012), and health care reform (in 2013) on pathology practice and the academic pathology community. We also discussed workforce issues in pathology and laboratory medicine. The time is now right to discuss how technological innovations and changes in health care delivery can be effectively operationalized in pathology over the next few years and what role academic pathology should play in this process. Accurate projections of the future are difficult to do and probably not realistic beyond a horizon of about 5-7 years. Thus, 6 years (i.e. 2020) may be an appropriate timeframe in which to try to project and plan for the future of pathology. Presentations and discussions will be focused on attempting to realistically project what pathology practice, education, and research will look like by 2020 and what concrete steps the academic pathology community should take now to ensure the best possible outcomes in each of the three areas.

July 8-11, 2014

Seaport Boston Hotel & World Trade Center, Boston, Massachusetts

3:00 pm - 5:30 pm

### Pre-Meeting Workshops:

Seaport World Trade Center

#### **Workshop #1: Genomics Training Workshop**

***(Sponsored by Training Residents in Genomics (TRIG) Workgroup. Audio-visual support for this session is sponsored by the Academic Mission Group Fund of the Association of Pathology Chairs.)***

Skyline Room, Plaza Level, Seaport World Trade Center

*Andrew Beck, MD, PhD; Lauren Briere, MS, CGC; Richard Haspel, MD, PhD, Beth Israel Deaconess Medical Center*

Next-generation sequencing methods and multi-gene panels have entered clinical practice. Pathologists, as directors of molecular pathology laboratories, are already playing a leading role in applying genomic technology to patient care. Recognizing the need to train pathology residents in genomic medicine, the Training Residents in Genomics (TRIG) Working Group was established in 2010. This PRODS Working Group is made up of experts in molecular pathology, medical education, and genetic counseling. With educational design support from the American Society for Clinical Pathology (ASCP), the TRIG Working Group developed and implemented well-received day-long workshops for pathology residents at the ASCP and United States and Canadian Academy of Pathology annual meetings. A train-the-trainer guide is now being developed to allow residency programs to locally implement this workshop.

This Genomic Pathology Workshop at the APC Annual Meeting will be an abbreviated form of the day-long version developed for residents. Using a case-based, interactive small-group approach, workshop participants will learn principles related to the development of genomic assays and interpretation of results. The workshop will also include practical hands-on instruction with the use of online genomic pathology tools. As such, we ask participants to bring a tablet or laptop (preferred).

We hope this workshop will give PRODS and APC members an opportunity to better understand the tools created by the TRIG Working Group and the potential utility of implementing a similar workshop at their institutions with the help of the train-the-trainer guide.

**Workshop #2: Methods for Effective Teaching of Laboratory Management**  
***(Co-sponsored by the American Society for Clinical Pathology and the American Pathology Foundation. Audio-visual support for this session is sponsored by the Academic Mission Group Fund of the Association of Pathology Chairs.)***

Cityview Ballroom I, Plaza Level, Seaport World Trade Center

Results of a survey of members of the PRODS Section of the Association of Pathology Chairs were presented during a workshop at the 2009 APC Annual Meeting and concluded there was extreme variability in the teaching of laboratory management to residents due to a number of factors, such as lack of faculty time, a lack of resident interest, and a lack of faculty interest. As a result of the workshop, a Laboratory Management

## Association of Pathology Chairs 2014 Annual Meeting

July 8-11, 2014

Seaport Boston Hotel & World Trade Center, Boston, Massachusetts

Curriculum Development Workgroup was formed and a laboratory curriculum was published in 2011 in the *American Journal of Clinical Pathology*.

Additionally, a set of 27 milestones for Pathology residency training has been drafted by a Pathology Milestones Workgroup of the ACGME. These milestones are a tool for residency program directors, faculty and residents. They not only shape residency training, but provide ongoing documentation of achieving desired outcomes of a competent practicing pathologist. Pathology core and subspecialty milestones will be implemented on July 1, 2014.

Finally, expectations for the new pathologist in practice have been outlined (Horowitz, RE, APC 2012 Annual Meeting) and include: communication skills, interpersonal skills, practice management, professional skills, leadership and teaching skills and laboratory direction. The experience of the pathologist in these areas varies by practice settings and there is a recognition that management training needs to be individualized both in content and timing.

This pre-meeting workshop is designed to provide participants with information, resources and tools to assist them in teaching laboratory management to residents. Sharing of practices will highlight various approaches to teaching this aspect of the residency curriculum including examples of how Pathology residency programs are addressing the ACGME Pathology milestones.

3:00 pm - 3:10 pm	Opening remarks <i>Ronald Weiss, MD, ARUP Laboratories</i>
3:10 pm - 3:30 pm	Overview of the laboratory management curriculum and the ACGME milestones <i>Christopher Stowell, MD, PhD, Massachusetts General Hospital</i>
3:30 pm - 3:50 pm	Recommendations for overcoming institutional and departmental obstacles to teaching laboratory management <i>Barbara McKenna, MD, University of Michigan</i>
3:50 pm - 4:20 pm	Resources and tools for teaching laboratory management <i>Scott Kirkley, MD, University of Rochester</i>
4:20 pm - 4:30 pm	Break
4:30 pm - 5:20 pm	Implementation of the ACGME laboratory management milestones: Sharing practices <i>Barbara McKenna, MD, University of Michigan; Christopher Stowell, MD, PhD, Massachusetts General Hospital; Ronald Weiss, MD, ARUP Laboratories; Enrique Terrazas, MD, University of California, San Francisco</i>

## Association of Pathology Chairs 2014 Annual Meeting

#### **Methods for Effective Teaching of Laboratory Management**

***(Co-sponsored by the American Society for Clinical Pathology and the American Pathology Foundation. Audio-visual support for this session is sponsored by the Academic Mission Group Fund of the Association of Pathology Chairs.)***

Cityview Ballroom I, Plaza Level, Seaport World Trade Center

Results of a survey of members of the PRODS Section of the Association of Pathology Chairs were presented during a workshop at the 2009 APC Annual Meeting and concluded there was extreme variability in the teaching of laboratory management to residents due to a number of factors, such as lack of faculty time, a lack of resident interest, and a lack of faculty interest. As a result of the workshop, a Laboratory Management Curriculum Development Workgroup was formed and a laboratory curriculum was published in 2011 in the *American Journal of Clinical Pathology*.

Additionally, a set of 27 milestones for Pathology residency training has been drafted by a Pathology Milestones Workgroup of the ACGME. These milestones are a tool for residency program directors, faculty and residents. They not only shape residency training, but provide ongoing documentation of achieving desired outcomes of a competent practicing pathologist. Pathology core and subspecialty milestones will be implemented on July 1, 2014.

Finally, expectations for the new pathologist in practice have been outlined (Horowitz, RE, APC 2012 Annual Meeting) and include: communication skills, interpersonal skills, practice management, professional skills, leadership and teaching skills and laboratory direction. The experience of

the pathologist in these areas varies by practice settings and there is a recognition that management training needs to be individualized both in content and timing.

This pre-meeting workshop is designed to provide participants with information, resources and tools to assist them in teaching laboratory management to residents. Sharing of practices will highlight various approaches to teaching this aspect of the residency curriculum including examples of how Pathology residency programs are addressing the ACGME Pathology milestones.

- 3:00 pm - 3:10 pm      Opening remarks

*Andrew Beck, MD, PhD; Lauren Briere, MS, CGC; Richard Haspel, MD, PhD, Beth Israel Deaconess Medical Center*

Next-generation sequencing methods and multi-gene panels have entered clinical practice. Pathologists, as directors of molecular pathology laboratories, are already playing a leading role in applying genomic technology to patient care. Recognizing the need to train pathology residents in genomic medicine, the Training Residents in Genomics (TRIG) Working Group was established in 2010. This PRODS Working Group is

residents in genomic medicine, the Training Residents in Genomics (TRIG) Working Group was established in 2010. This PRODS Working Group is made up of experts in molecular pathology, medical education, and genetic counseling. With educational design support from the American Society for Clinical Pathology (ASCP), the TRIG Working Group developed and implemented well-received day-long workshops for pathology residents at the ASCP and United States and Canadian Academy of Pathology annual meetings. A train-the-trainer guide is now being developed to allow residency programs to locally implement this workshop.

This Genomic Pathology Workshop at the APC Annual Meeting will be an abbreviated form of the day-long version developed for residents. Using a case-based, interactive small-group approach, workshop participants will learn principles related to the development of genomic assays and interpretation of results. The workshop will also include practical hands-on instruction with the use of online genomic pathology tools. As such, we ask participants to bring a tablet or laptop (preferred).

We hope this workshop will give PRODS and APC members an opportunity to better understand the tools created by the TRIG Working Group and the potential utility of implementing a similar workshop at their institutions with the help of the train-the-trainer guide.

3:00 pm - 5:30 pm

**Workshop #2: Methods for Effective Teaching of Laboratory Management (Co-sponsored by the American Society for Clinical Pathology and the American Pathology Foundation. Audio-visual support for this session is sponsored by the Academic Mission Group Fund of the Association of Pathology Chairs.)**

Cityview Ballroom I, Plaza Level, Seaport World Trade Center

Results of a survey of members of the PRODS Section of the Association of Pathology Chairs were presented during a workshop at the 2009 APC Annual Meeting and concluded there was extreme variability in the teaching of laboratory management to residents due to a number of factors, such as lack of faculty time, a lack of resident interest, and a lack of faculty interest. As a result of the workshop, a Laboratory Management Curriculum Development Workgroup was formed and a laboratory curriculum was published in 2011 in the *American Journal of Clinical Pathology*.

Additionally, a set of 27 milestones for Pathology residency training has been drafted by a Pathology Milestones Workgroup of the ACGME. These milestones are a tool for residency program directors, faculty and residents. They not only shape residency training, but provide ongoing documentation of achieving desired outcomes of a competent practicing pathologist. Pathology core and subspecialty milestones will be implemented on July 1, 2014.

Finally, expectations for the new pathologist in practice have been outlined (Horowitz, RE, APC 2012 Annual Meeting) and include: communication skills, interpersonal skills, practice management, professional skills,

leadership and teaching skills and laboratory direction. The experience of the pathologist in these areas varies by practice settings and there is a recognition that management training needs to be individualized both in content and timing.

This pre-meeting workshop is designed to provide participants with information, resources and tools to assist them in teaching laboratory management to residents. Sharing of practices will highlight various approaches to teaching this aspect of the residency curriculum including examples of how Pathology residency programs are addressing the ACGME Pathology milestones.

## Continuing Medical Education (CME) Information

**CME Accreditation Statement:** This activity (“APC 2014 Annual Meeting”) has been planned and implemented in accordance with the Essential Areas and policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint sponsorship of the American Society for Clinical Pathology (ASCP) and the Association of Pathology Chairs (APC). ASCP is accredited by the ACCME to provide continuing medical education for physicians.

The ASCP designates this “live” educational activity (“APC 2014 Annual Meeting”) for a maximum of 22.0 *AMA PRA Category 1 Credit(s)*<sup>™</sup>. Physicians should only claim credit commensurate with the extent of their participation in the activity.

CME applications are available online ([www.apcprods.org/Boston2014/CME](http://www.apcprods.org/Boston2014/CME)) beginning **July 1, 2014**. Should you have questions, please contact the APC Office (301-634-7880; email [info@apcprods.org](mailto:info@apcprods.org)).

**Meeting Objective/Target Audience:** The APC Annual Meeting is a three-day meeting that provides educational activities for three major target audiences: (1) Chairs of Pathology and Laboratory Medicine Departments; (2) Program Directors and Associate Directors of Residency Training Programs; and (3) Course Directors of pathology courses in LCME-accredited medical schools in North America. The objective of the meeting is to facilitate knowledge acquisition regarding the ability of academic Pathology and Laboratory Medicine departments to carry out their missions in teaching, clinical service, and research. The meeting therefore focuses on undergraduate (medical school), graduate (residency and fellowship) Pathology education, and the practice of Pathology and Laboratory medicine in academic medical centers and hospitals. Content focuses on issues such as the development of educational programs and curricula for the training of medical students, residents, fellows, and senior pathologists on providing cost-effective, high-quality clinical service to patients. The meeting also features content related to research and implementation of cutting edge practice tools, such as diagnostics, genomic medicine, and bioinformatics; and their implications on future healthcare delivery, as well as workforce development and realignment to support current and new skill sets required to practice Pathology and Laboratory Medicine now and into the future.

The target audience is professionals (MD, DO, PhD) and others who serve as the academic, medical, scientific, and administrative leaders of departments of pathology and laboratory medicine in the United States and Canada.

**Disclosure of Financial Relationships and Resolution of Conflicts of Interest:** In order to ensure balance, independence, objectivity and scientific rigor in all of its educational activities, and in accordance with ACCME Standards, the ASCP requires all individuals in a position to influence and/or control the content of ASCP CME activities to disclose to the ASCP and subsequently to learners whether they do or do not have any relevant financial relationships with proprietary entities producing health care goods or services that are discussed in CME activities. Faculty are asked to use generic names in any discussion of therapeutic options, to base patient care recommendations on scientific evidence and to base information regarding commercial products/services on scientific methods generally accepted by the medical community. All ASCP CME activities are evaluated by participants for the presence of any commercial bias and this input is used for subsequent CME planning decisions. The primary purpose of this activity is educational and the comments, opinions and/or recommendations expressed by the faculty or authors are their own and not those of ASCP.

None of the organizers of this educational activity (as listed in this section) disclosed a relevant financial relationship.

The following presenters have indicated relationships that have been reviewed and commercial conflicts of interest resolved. In all cases, it was determined that the financial relationship did not relate to the educational assignment or that the commercial entity does not produce, market, re-sell or distribute health care goods or services consumed by, or used on patients. If a presenter is not listed, then he/she had no commercial interest to disclose.

**Invited Speaker Disclosures:**

----------------------------------	------------------	------------------------------

**PLEASE NOTE:**

Please refer to the APC Meeting Evaluation and CME Application Workbook for a consolidated list of sessions that are eligible for *AMA PRA Category 1 Credit(s)*<sup>TM</sup>. APC, PRODS and UMEDS sessions are eligible for *AMA PRA Category 1 Credit(s)*<sup>TM</sup> except where noted in the meeting program. PDAS and GMEAS sessions are not eligible for *AMA PRA Category 1 Credit(s)*<sup>TM</sup>. Visiting exhibits is not an approved continuing medical education activity. Most meals are not approved for continuing medical education credit; however, some special breakfasts and lunches that have educational content are eligible for Continuing Medical Education credit as noted in your APC Meeting Evaluation and CME Application Workbook. The meeting program states those events that are not a Continuing Medical Education activity.

**"Promoting Excellence in Academic Pathology"**

The Association of Pathology Chairs serves as the voice of academic pathology. The mission of the APC is to provide leadership and to advocate for the dynamic discipline of pathology. The APC provides education, training, information resources and networking opportunities for chairs, residency program directors, undergraduate medical educators, department administrators, and graduate program coordinators. For more information, visit [www.apcprods.org](http://www.apcprods.org).

**Overall Meeting Evaluation:**

My objectives in attending this meeting included: (check all that apply)

- Learning more about workforce development and realignment to support current and new skill sets required to practice Pathology and Laboratory Medicine now and into the future.
- Learning the newest advances in research and implementation of cutting edge practice tools, such as diagnostics, genomic medicine, and bioinformatics; and their implications on future healthcare delivery.
- Learning the newest approaches to the development of educational programs and curricula for the training of medical students, residents, fellows, and senior pathologists.
- Making contacts to help me meet new educational objectives or duties.
- Increasing the quality of patient care provided through my pathology department.

My objectives were fulfilled:    Yes    No

## ▶ Medical Student Interest Groups

ICPI has launched a new program to support Medical Student Interest Groups. ICPI will fund a limited number of programs at \$1,000 each. The goal is to develop a "best practices" for medical student interest groups. Applications for the 2015 Academic year will be available July 1, 2014.

## ▶ ICPI Trainee Travel Award Program

ICPI has a program to support trainee participation in scientific meetings organized by its sponsoring societies. A limited number of ICPI Trainee Travel Awards are available.

There are two types of Travel Awards:

- **Travel Award:** \$500.00 for trainees who do not submit an abstract
- **Travel Award with Abstract:** \$750.00 for trainees who submit an abstract to the meeting they are attending

The stipend is intended to offset the travel costs for attending one of ICPI's member societies' meetings. Awardees must currently be a trainee (medical student, graduate student, resident, fellow) member of one of the participating societies of ICPI.

## Find out what membership can do for you!

### Make ASIP Your Professional Home!

Members of the American Society for Investigative Pathology (ASIP) are biomedical scientists from around the world serving in academia, biotechnology, hospitals & clinics, pharmaceuticals, non-profits and for-profits. For over 100 years, members of ASIP have conducted ground-breaking research that provides the foundation for today's discoveries in the understanding, diagnosis, and treatment of diseases.

### But I Don't Consider Myself a Pathologist...

ASIP Members represent a wide-variety of scientific disciplines and work in pathology and non-pathology departments. Our mission is to research and discover the fundamental cellular and molecular mechanisms of disease. Experience first-hand the benefits of networking with your colleagues from around the globe, build lifelong friendships, and share your discoveries with others at the Annual Meeting. There's a place for you at ASIP!

### The ASIP Next Century Campaign - Give ASIP a Try With this Special Membership Category!

In celebration of our Next Century as a Society, ASIP is excited to offer NEW ASIP members the opportunity to join ASIP at a discounted dues rate. We are offering new, lower rates for Trainee and Emeritus members. In addition, we have added a completely NEW Membership Category! Our Next Century Membership category offers 90% of the benefits of Regular Membership\* at about 50% of the cost! With all of these options, now is a GREAT time to join!

### Meetings and Continuing Education Courses

- Scientific meetings and continuing education courses (CME) with reduced registration fees.
- **FREE** subscription to the ASIP *AJP* Journal CME Program in Pathogenesis
- **Reduced subscription rate** to the *JMD* Journal CME Program in Molecular Diagnostics
- **FREE Access to the NEW Online ASIP Digital Library** containing presentations and content from previously held ASIP events!
- **ASIP Regular Member\*** authors receive a rebate on one (1) color figure when publishing in *AJP* and/or *JMD*.

### Subscriptions to the Leading Journals in Pathology

- *The American Journal of Pathology (AJP)* **FREE** online subscription with the option to add a print subscription at a reduced rate.
- *The Journal of Molecular Diagnostics (JMD)* **FREE** online subscription with the option to add a print subscription at a reduced rate.
- **Discounts** on select publications from Annual Reviews and Elsevier

### Networking & Society News

- Listservs
- *ASIP Pathways*, the Society Newsletter
- Scientific Interest Groups (SIG) provide opportunities for networking and collaboration with other members who share your research interests. Current SIGs include:

Biobanking	Immunohistochemistry and Microscopy	Neuropathology
Biophysical Pathology	Inflammation/Immunopathology	Pulmonary Pathobiology
Breast Cancer	Informatics	Regenerative Medicine
Cell Injury	Liver Pathobiology	Vascular and Mucosal Pathobiology
Environmental and Toxicologic Pathology	Molecular Markers of Disease	Veterinary Pathology
Gene Expression	Neoplasia/Growth Regulation

for  
Residents

## Pathology Informatics Essentials for Residents (PIER)

PIER is a research-based instructional resource developed jointly by the Association of Pathology Chairs, Association for Pathology Informatics, and the College of American Pathologists. It presents informatics topics and other key training elements for PRODS and faculty to effectively implement informatics training and meet the ACGME informatics milestone requirements.

PIER will help your residents enhance essential skills required now and in the future.

Please visit the CAP Booth to learn more about this new resource.
