PATHOLOGY NEXT

Inspirata is proud to be a Diamond Sponsor at APC 2016. Visit us at **Booth #4** to learn more about PathologyNEXTSM and how we're helping Pathology Chairs craft a vision to lead their departments into the 21st Century. We can help you overcome the financial barriers to adoption and be the catalyst to accelerate diagnoses and generate new revenue streams through telepathology and other initiatives.

Attend our workshop and luncheon from 10 am - 1 pm on Tuesday, July 12th.

COLLEGE of AMERICAN
PATHOLOGISTS

Fulfill your patient safety course requirement and earn CME/SAM credit

Completing the course “Creating a Culture of Safety for Patients” provides:

- Five CME/SAM credits
- An overview of the key concepts and principles of patient safety and how they are applied in laboratory medicine
- Credit towards the American Board of Pathology (ABP) Maintenance of Certification (MOC) Component I Patient Safety Course (PSC) requirement
- Best practices in patient safety developed by pathologists for pathologists

Register for the course at learn.cap.org.

“Excellent review of patient safety, critical to daily practice of pathology and effective patient care”

– Course participant

“It really highlights our activities in pathology that help add value to patient safety and explains how pathology fits into the wider scheme of institutional patient care.”

UNIVERSITY OF
PATHOLOGY INFORMATICS
A joint collaboration between API and ASCP

Introducing

UNIVERSITY OF PATHOLOGY INFORMATICS

A new self-paced online certificate program leveraging case-based learning to develop critical knowledge of informatics concepts.

Case-Based Learning Approach

Learn how informatics can be leveraged to increase quality, specimen throughput, and patient safety while controlling costs in the laboratory.

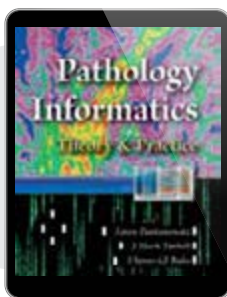

Core Competencies Covered:

- Information Fundamentals
- Information Systems
- Workflow and Processes
- Governance and Management

Utilizing a case-based approach, you will act as the project lead to develop a pathology informatics needs assessment for a laboratory.

After completing up to 20 on-demand courses, you will be able to:

- Conduct an audit of existing lab systems including hardware, software, peripherals and databases
- Create a high-level dataflow diagram of the laboratory network
- Document existing workflow and create a high-level redesign of workflow process in light of a new LIS
- Prepare an executive briefing addressing the challenge of legacy systems, opportunities for process improvement and integration with EMR, workflow impact of a new LMS, and suggestions for next steps

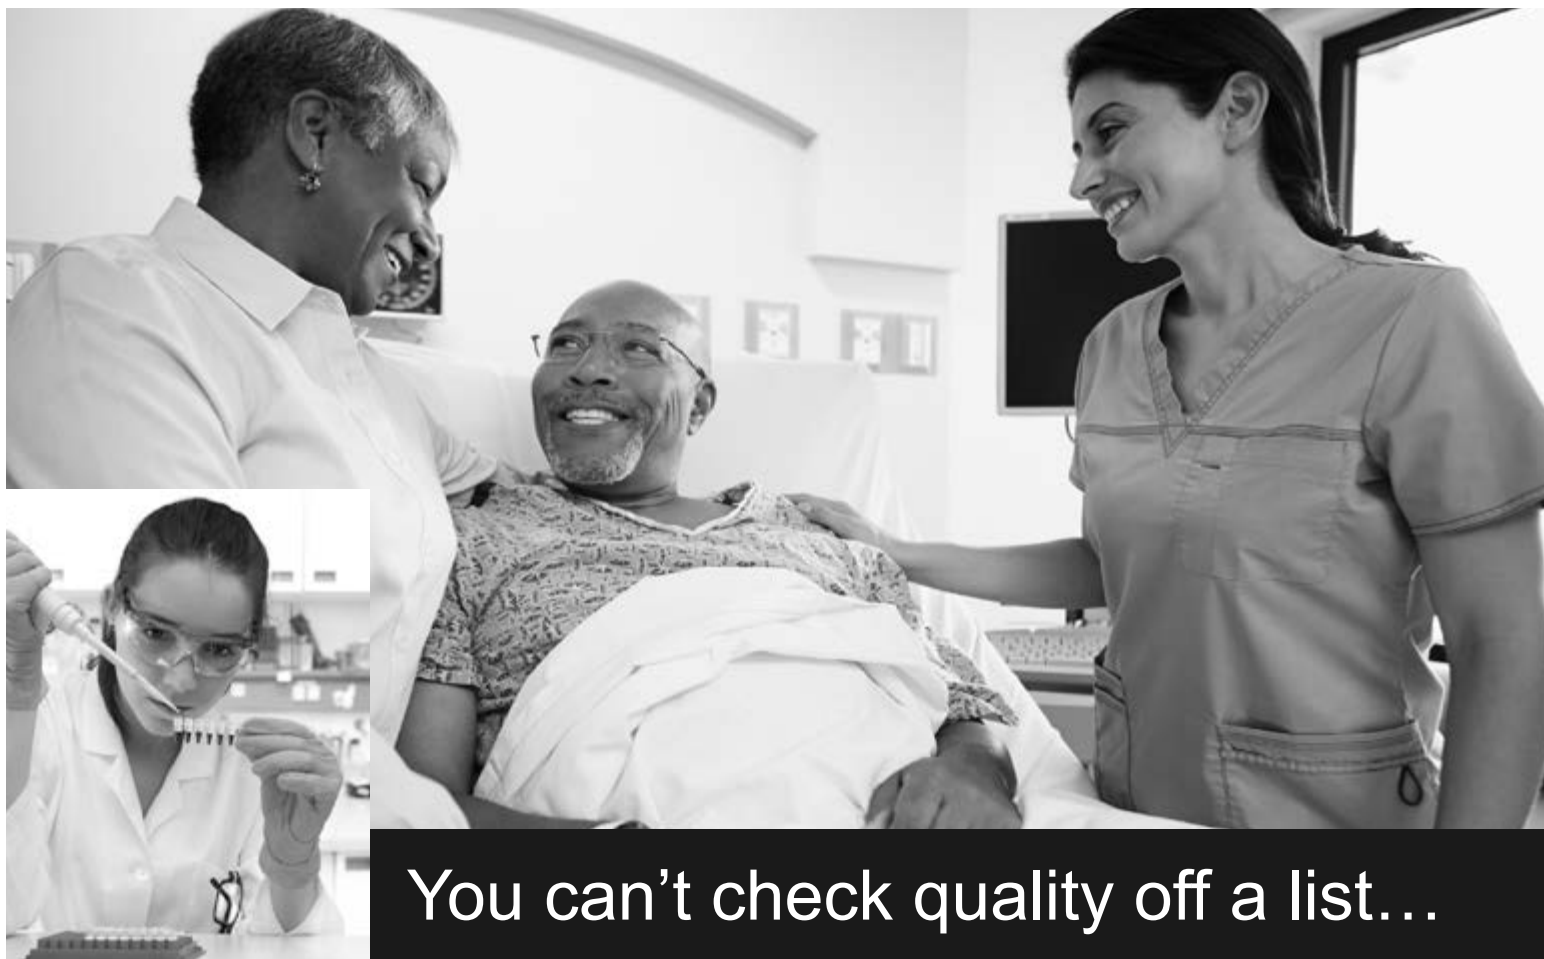

Complimentary eBook

Purchase UPI and receive *Pathology Informatics: Theory and Practice* eBook.

Value: \$119

Developed by ASCP and the
Association for Pathology Informatics

You can't check quality off a list...

When choosing a lab accreditation body, you need to make an important decision. Are you interested in crossing items off a list or is your lab more concerned with how its vital work affects patient care?

Every Joint Commission standard, and every process ties back to assuring safe and high quality patient care. With the lab a key component in both testing and diagnosis, we uniquely provide tools and resources to help your lab team concentrate on the processes that are most important to your most important people – your patients. Our standards are not prescriptive, giving your laboratory the flexibility to lay down processes and systems that make the best sense for your laboratory.

With over 30 years of experience surveying laboratories and providing best practices, an educative survey process performed by laboratorians and pathologists and tools to help you achieve and maintain accreditation, we're committed to quality for both your lab and your patients.

INTERSOCIETY COUNCIL FOR PATHOLOGY INFORMATION (ICPI)

The Intersociety Council for Pathology Information (ICPI) is a nonprofit educational organization sponsored by five national pathology societies to serve as a central source of information about pathology in the practice of medicine, in medical research, and to provide literature about pathology as a career.

Medical Student Interest Groups

Because Medical Student Interest Groups are a great mechanism to encourage outstanding medical students to consider a career in pathology, ICPI's support can be used to enhance an existing program or develop a new one! ICPI will fund a limited number of programs each year. The goal is to develop a "best practices" for medical student interest groups.

ICPI Trainee Travel Award Program

ICPI supports trainee participation in scientific meetings organized by its participating societies. A limited number of ICPI Trainee Travel Awards are available.

NEW IN 2016 - \$500.00 will be awarded to trainees who are an author/co-author on an accepted abstract at the meeting they are attending. Applications of inductees of the Pathology Honor Society will be given priority.

The stipend is intended to offset the travel costs for attending one of ICPI's member societies' meetings. Awardees must currently be a trainee (medical student, graduate student, resident, fellow) member of one of the participating societies of ICPI.

PATHPrimer

Give Educators An Advantage

Use an integrated, comprehensive anatomic pathology curriculum.

With unparalleled benefits for administrators, educators and residents, PATHPrimer is the most valuable educational resource you can employ in your pathology department today.

Comprehensive Curriculum

PATHPrimer draws upon the knowledge and expertise of thought leaders in pathology to deliver the most comprehensive anatomic pathology curriculum available.

Progress Reports

PATHPrimer allows instructors to track, document and report trainee progress to identify problem areas and respond quickly to ensure resident success.

Educational Consistency

Our curriculum provides uniform instruction system-wide, with information and techniques at the forefront of pathological medicine.

Corista (Booth #7)

Corista's DP3 comprehensive clinical workflow suite for digital pathology establishes tumor boards in minutes, automates QA, and launches real-time peer reviews. DP3 puts the power of universal access, workflow optimization, collaboration, analysis, and robust search directly into the hands of pathologists worldwide. DP3 natively reads images from every whole slide scanner, integrates with every LIS, and was awarded the Frost & Sullivan Product Innovation Award. This is Integrated Pathology™ only from Corista. www.corista.com

Inspirata, Inc. (Booth #4)

Inspirata provides an end-to-end digital pathology workflow solution that digitizes and automates the entire case review process using a unique, "solution-as-a-service" delivery model. This comprehensive solution includes workflow automation and high-throughput slide scanning as well as hi-res image viewing, computer-aided screening, collaboration tools, integrated data feeds from disparate clinical systems and reporting—all available in a single sign-on cockpit. www.inspirata.com

PLATINUM Partner Descriptions

American Society for Clinical Pathology (Booth #5)

ASCP unites over 100,000 pathologists and laboratory professionals to accelerate the advancement of laboratory medicine to improve patient care through knowledge, collaboration and global community. Our mission is to provide excellence in education, certification and advocacy on behalf of patients, pathologists and laboratory professionals across the globe. www.ascp.org

College of American Pathologists (Booth #2)

As the leading organization for board-certified pathologists, the College of American Pathologists (CAP) serves patients, pathologists, and the public by fostering and advocating excellence in the practice of pathology and laboratory medicine worldwide. With more than 18,000 physician members, the CAP has led laboratory accreditation for more than 50 years with more than 7,700 CAP-accredited laboratories in 50 countries. www.cap.org

Continuing Medical Education (CME) Information

STRONGERTOGETHER

CME Accreditation Statement: This activity (“APC 2016 Annual Meeting”) has been planned and implemented in accordance with the Essential Areas and policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint providership of the American Society for Clinical Pathology (ASCP) and the Association of Pathology Chairs (APC). ASCP is accredited by the ACCME to provide continuing medical education for physicians.

The ASCP designates this “live” educational activity (“APC 2016 Annual Meeting”) for a maximum of **24.50 AMA PRA Category 1 Credit(s)TM**. Physicians should claim only credit commensurate with the extent of their participation in the activity.

CME applications are available online (www.apcprods.org/meetings-2016-cme-eval) beginning **July 1, 2016**. Should you have questions, please contact the APC Office (301-634-7880; email info@apcprods.org).

Meeting Objective/Target Audience: The APC Annual Meeting is a three-day meeting that provides educational activities for three major target audiences: (1) Chairs of Pathology and Laboratory Medicine Departments; (2) Program Directors and Associate Directors of Residency Training Programs; and (3) Course Directors of pathology courses in LCME-accredited medical schools in North America. The objective of the meeting is to facilitate knowledge acquisition regarding the ability of academic Pathology and Laboratory Medicine departments to carry out their missions in teaching, clinical service, and research. The meeting therefore focuses on undergraduate (medical school) and graduate (residency and fellowship) Pathology education, and the practice of Pathology and Laboratory medicine in academic medical centers and hospitals. Content focuses on issues such as the development of educational programs and curricula for the training of medical students, residents, fellows, and senior pathologists on providing cost-effective, high-quality clinical service to patients. The meeting also features content related to research and implementation of cutting edge practice tools, such as diagnostics, genomic medicine, and bioinformatics; and their implications on future healthcare delivery, as well as workforce development and realignment to support current and new skill sets required to practice Pathology and Laboratory Medicine now and into the future.

The target audience is professionals (MD, DO, PhD) and others who serve as the academic, medical, scientific, and administrative leaders of departments of pathology and laboratory medicine in the United States and Canada.

Disclosure of Financial Relationships and Resolution of Conflicts of Interest: In order to ensure balance, independence, objectivity and scientific rigor in all of its educational activities, and in accordance with ACCME Standards, the ASCP requires all individuals in a position to influence and/or control the content of ASCP CME activities to disclose to the ASCP and subsequently to learners whether they do or do not have any relevant financial relationships with proprietary entities producing health care goods or services that are discussed in CME activities. Faculty are asked to use generic names in any discussion of therapeutic options, to base patient care recommendations on scientific evidence and to base information regarding commercial products/services on scientific methods generally accepted by the medical community. All ASCP CME activities are evaluated by participants for the presence of any commercial bias and this input is used for subsequent CME planning decisions. The primary purpose of this activity is educational and the comments, opinions and/or recommendations expressed by the faculty or authors are their own and not those of ASCP.

None of the organizers of this educational activity (as listed in this section) disclosed a relevant financial relationship.

The following presenters have indicated relationships that have been reviewed, and their commercial conflicts of interest have been resolved. In all cases, it was determined that the financial relationship did not relate to the educational assignment. If a presenter is not listed, then he/she had no commercial interest to disclose.

Invited Speaker Disclosures:

James M. Crawford, MD, PhD, Hofstra Northwell School of Medicine

Commercial Interest: ClaraPath	Role: Member, Scientific Advisory Group	Compensation: Stock Options
-----------------------------------	--	--------------------------------

Anthony Magliocco, MD, Moffitt Cancer Center and Research Institute

Commercial Interest: DiaCarta	Role: Consultant	Compensation: Travel Reimbursement
Commercial Interest: BioTheranostics	Role: Consultant	Compensation: Travel Reimbursement
Commercial Interest: Leica Biosystems	Role: Invited Speaker	Compensation: Travel Reimbursement

PLEASE NOTE:

Please refer to the CME Application Workbook on the following pages for a consolidated list of sessions that are eligible for *AMA PRA Category 1 Credit(s)*TM. APC, PRODS and UMEDS sessions are eligible for *AMA PRA Category 1 Credit(s)*TM except where noted in the meeting program. PDAS and GMEAS sessions are not eligible for *AMA PRA Category 1 Credit(s)*TM. Visiting exhibits is not an approved continuing medical education activity. Most meals are not approved for continuing medical education credit; however, some special breakfasts and lunches that have educational content are eligible for Continuing Medical Education credit as noted in your APC Meeting Evaluation and CME Application Workbook. The meeting program states those events that are not a Continuing Medical Education activity.

"Promoting Excellence in Academic Pathology"

The Association of Pathology Chairs serves as the voice of academic pathology. The mission of the APC is to provide leadership and to advocate for the dynamic discipline of pathology. The APC provides education, training, information resources and networking opportunities for chairs, residency program directors, undergraduate medical educators, department administrators, and graduate program coordinators. Overall Meeting Evaluation:

My objectives in attending this meeting included: (check all that apply)

- Learning more about workforce development and realignment to support current and new skill sets required to practice Pathology and Laboratory Medicine now and into the future.
- Learning the newest advances in research and implementation of cutting edge practice tools, such as diagnostics, genomic medicine, and bioinformatics; and their implications on future healthcare delivery.
- Learning the newest approaches to the development of educational programs and curricula for the training of medical students, residents, fellows, and senior pathologists.
- Making contacts to help me meet new educational objectives or duties.
- Increasing the quality of patient care provided through my pathology department.

My objectives were fulfilled: Yes No

PathologyNEXT: The Times They Are A-Changin' – Overcoming Barriers to Realize the Benefits of Digital Pathology Today

Santiago II & III (lunch immediately after, for attendees only)

[This is not a Continuing Medical Education activity]

This workshop includes a keynote address from CAP President, Richard Friedberg, about the current state of digital pathology in the U.S. , followed by an overview of the challenges that are creating barriers to the adoption of digital pathology and how to overcome them presented by Mark Lloyd, PhD, Inspirata. Next, Dr. Lloyd will moderate a panel of six subject matter experts who will answer audience questions and discuss a broad range of topics spanning workflow automation, infrastructure requirements, interoperability, image analysis, revenue generation and big data. Panelists include Ulysses Balis, MD, University of Michigan; David Dimond, EMC Corporation; Michael Feldman, MD, PhD, University of Pennsylvania; Richard Friedberg, MD, PhD, Baystate Health; Anant Madabhushi, PhD, Case Western Reserve University; and John Tomaszewski, MD, State University of New York at Buffalo.

Technology Adoption: Breaking Down Barriers & Transforming Precision Medicine

Granada Room

[This is not a Continuing Medical Education activity]

External market forces continue to redefine where point-of-care is delivered, where slides are produced and where diagnoses are rendered, as well as defining who the customer is in the healthcare continuum. This presentation will briefly touch on historical experience, then delve into the changes that are happening to pathology and their resulting impact on operations. Discussion will include the impact of cloud and hand-held computing, as well as social media, that coincide with the maturation of this technology. We will conclude by making a business case and establish why the time is now to adopt digital pathology. Featured speaker: Keith Kaplan, MD, Corista

July 12-15, 2016

Rancho Bernardo Inn – San Diego, California

1:00 pm – 5:00 pm

Leadership Skills Development Workshop (For Chairs and PDAS Members) **[Maximum 50 Participants – Pre-Meeting Workshop Registration Required]**

Bernardo Ballroom – East

Program Leader: Catherine Stakenas, American Society for Clinical Pathology

Faculty Facilitators: Barbara McKenna, MD, University of Michigan; Karim Sirgi, MD, MBA, Lambda X3 International

This Leadership Workshop is designed to develop skills in communication, critical thinking, teamwork, resource management and complex problem-solving. The workshop provides participants with an understanding of “self” including work strengths and weaknesses, problem resolution style, and interpersonal skills through two different approaches. The Desert Survival Situation will employ synergistic problem-solving in a highly interactive session to elicit effective group decision-making and problem solving; skills that are essential in professional situations. The FISH! Philosophy session will focus on finding inner joy and strength to improve day-to-day perspectives and company culture, as part of a broader program for organizations to bolster the morale of their employees and strengthen customer and vendor relationships.

(This workshop was developed and supported by the American Society for Clinical Pathology and the American Pathology Foundation.)

2:30 pm – 5:30 pm

Biorepository Management Workshop

Aragon Ballroom II

Co-Moderators: William Muller, MD, PhD, Northwestern University; Daniel Remick, MD, Boston University

Biobanking by pathology represents an opportunity to contribute to science by providing biospecimens that meet the highest quality standards and meeting ethical standards for collection. Pathology is the logical discipline to collect biospecimens since we understand what must be retained to ensure the correct clinical diagnosis and how to process tissue. This workshop will present information about how to budget to cover the costs of a biobank and provide an update about the proposed new rules. APC members will also share their individual approaches to biobanking successes and challenges.

2:30 pm – 3:00 pm

Biobanking Budget and Business: Strengths, Weaknesses, Opportunities, and Constraints

Chris Andry, PhD, Boston University

3:00 pm – 3:30 pm

“Ask the Senior Fellows” Forum

(For Chairs and Senior Fellows – no RSVP required)

Aragon Ballroom IIIA/B

Moderator: Fred Sanfilippo, MD, PhD, Emory University

[This is not a Continuing Medical Education activity]

The APC Senior Fellows are a group of over 40 prior Pathology Chairs who are involved in helping the APC mission. Several of the past chairs have also had other medical school, medical center, university, and non-university leadership positions as deans, executive VPs and CEOs. The major goal of the Senior Fellows is to assist current chairs and other members of the APC, especially in providing advice, consultation, and mentoring based on their experience. In this session, Senior Fellows will address topics of interest to current chairs including: 1) strategic & financial planning; 2) interactions with hospital leaders; 3) interactions with deans, as well as other chairs and medical school leaders; and 4) dealing with difficult faculty. Individual questions posed by chairs will also be discussed.

Pre-Meeting Workshops and Sessions:

8:00 am – 12:00 pm

Leadership Skills Development Workshop (For PRODS, UMEDS and GMEAS)
[Maximum 50 Participants – Pre-Meeting Workshop Registration Required]

Bernardo Ballroom – East

Program Leader: Catherine Stakenas, American Society for Clinical Pathology

Faculty Facilitators: Barbara McKenna, MD, University of Michigan; Karim Sirgi, MD, MBA, Lambda X3 International

This Leadership Workshop is designed to develop skills in communication, critical thinking, teamwork, resource management and complex problem-solving. The workshop provides participants with an understanding of “self” including work strengths and weaknesses, problem resolution style, and interpersonal skills through two different approaches. The Desert Survival Situation will employ synergistic problem-solving in a highly interactive session to elicit effective group decision-making and problem solving; skills that are essential in professional situations. The FISH! Philosophy session will focus on finding inner joy and strength to improve day-to-day perspectives and company culture, as part of a broader program for organizations to bolster the morale of their employees and strengthen customer and vendor relationships.

(This workshop was developed and supported by the American Society for Clinical Pathology and the American Pathology Foundation.)

10:00 am – 12:00 pm

Medicine**

Granada Room

[This is not a Continuing Medical Education activity]

External market forces continue to redefine where point-of-care is delivered, where slides are produced and where diagnoses are rendered, as well as defining who the customer is in the healthcare continuum. This presentation will briefly touch on historical experience, then delve into the changes that are happening to pathology and their resulting impact on operations. Discussion will include the impact of cloud and hand-held computing, as well as social media, that coincide with the maturation of this technology. We will conclude by making a business case and establish why the time is now to adopt digital pathology. Featured speaker: Keith Kaplan, MD, Corista

2:30 pm – 5:30 pm

Biorepository Management Workshop

Aragon Ballroom II

Co-Moderators: William Muller, MD, PhD, Northwestern University; Daniel Remick, MD, Boston University

Biobanking by pathology represents an opportunity to contribute to science by providing biospecimens that meet the highest quality standards and meeting ethical standards for collection. Pathology is the logical discipline to collect biospecimens since we understand what must be retained to ensure the correct clinical diagnosis and how to process tissue. This workshop will present information about how to budget to cover the costs of a biobank and provide an update about the proposed new rules. APC members will also share their individual approaches to biobanking successes and challenges.

PathologyNEXT: The Times They Are A-Changin' – Overcoming Barriers to Realize the Benefits of Digital Pathology Today

Santiago II & III (lunch immediately after, for attendees only)

[This is not a Continuing Medical Education activity]

This workshop includes a keynote address from CAP President, Richard Friedberg, about the current state of digital pathology in the U.S. , followed by an overview of the challenges that are creating barriers to the adoption of digital pathology and how to overcome them presented by Mark Lloyd, PhD, Inspirata. Next, Dr. Lloyd will moderate a panel of six subject matter experts who will answer audience questions and discuss a broad range of topics spanning workflow automation, infrastructure requirements, interoperability, image analysis, revenue generation and big data. Panelists include Ulysses Balis, MD, University of Michigan; David Dimond, EMC Corporation; Michael Feldman, MD, PhD, University of Pennsylvania; Richard Friedberg, MD, PhD, Baystate Health; Anant Madabhushi, PhD, Case Western Reserve University; and John Tomaszewski, MD, State University of New York at Buffalo.

Technology Adoption: Breaking Down Barriers & Transforming Precision Medicine

Granada Room

[This is not a Continuing Medical Education activity]

External market forces continue to redefine where point-of-care is delivered, where slides are produced and where diagnoses are rendered, as well as defining who the customer is in the healthcare continuum. This presentation will briefly touch on historical experience, then delve into the changes that are happening to pathology and their resulting impact on operations. Discussion will include the impact of cloud and hand-held computing, as well as social media, that coincide with the maturation of this technology. We will conclude by making a business case and establish why the time is now to adopt digital pathology. Featured speaker: Keith Kaplan, MD, Corista

Leadership Skills Development Workshop (For Chairs and PDAS Members)
[Maximum 50 Participants – Pre-Meeting Workshop Registration Required]

Bernardo Ballroom – East

*Program Leader: Catherine Stakenas, American Society for Clinical Pathology
Faculty Facilitators: Barbara McKenna, MD, University of Michigan; Karim Sirgi, MD, MBA, Lambda X3 International*

This Leadership Workshop is designed to develop skills in communication, critical thinking, teamwork, resource management and complex problem-solving. The workshop provides participants with an understanding of “self” including work strengths and weaknesses, problem resolution style, and interpersonal skills through two different approaches. The Desert Survival Situation will employ synergistic problem-solving in a highly interactive session to elicit effective group decision-making and problem solving; skills that are essential in professional situations. The FISH! Philosophy session will focus on finding inner joy and strength to improve day-to-day perspectives and company culture, as part of a broader program for organizations to bolster the morale of their employees and strengthen customer and vendor relationships.

(This workshop was developed and supported by the American Society for Clinical Pathology and the American Pathology Foundation.)

2:30 pm – 5:30 pm

Biorepository Management Workshop

Aragon Ballroom II

Co-Moderators: William Muller, MD, PhD, Northwestern University; Daniel Remick, MD, Boston University

Biobanking by pathology represents an opportunity to contribute to science by providing biospecimens that meet the highest quality standards and meeting ethical standards for collection. Pathology is the logical discipline to collect biospecimens since we understand what must be retained to ensure the correct clinical diagnosis and how to process tissue. This workshop will present information about how to budget to cover the costs of a biobank and provide an update about the proposed new rules. APC members will also share their individual approaches to biobanking successes and challenges.

Leadership Skills Development Workshop (For UMEDS, PRODS and GMEAS)
[Maximum 50 Participants – Pre-Meeting Workshop Registration Required]

Bernardo Ballroom – East

Program Leader: Catherine Stakenas, American Society for Clinical Pathology

Faculty Facilitators: Barbara McKenna, MD, University of Michigan; Karim Sirgi, MD, MBA, Lambda X3 International

This Leadership Workshop is designed to develop skills in communication, critical thinking, teamwork, resource management and complex problem-solving. The workshop provides participants with an understanding of “self” including work strengths and weaknesses, problem resolution style, and interpersonal skills through two different approaches. The Desert Survival Situation will employ synergistic problem-solving in a highly interactive session to elicit effective group decision-making and problem solving; skills that are essential in professional situations. The FISH! Philosophy session will focus on finding inner joy and strength to improve day-to-day perspectives and company culture, as part of a broader program for organizations to bolster the morale of their employees and strengthen customer and vendor relationships.

(This workshop was developed and supported by the American Society for Clinical Pathology and the American Pathology Foundation.)

10:00 am – 12:00 pm

Technology Adoption: Breaking Down Barriers & Transforming Precision Medicine

Granada Room

[This is not a Continuing Medical Education activity]

External market forces continue to redefine where point-of-care is delivered, where slides are produced and where diagnoses are rendered, as well as defining who the customer is in the healthcare continuum. This presentation will briefly touch on historical experience, then delve into the changes that are happening to pathology and their resulting impact on operations. Discussion will include the impact of cloud and hand-held computing, as well as social media, that coincide with the maturation of this technology. We will conclude by making a business case and establish why the time is now to adopt digital pathology. Featured speaker: Keith Kaplan, MD, Corista

2:30 pm – 5:30 pm

Biorepository Management Workshop

Co-Moderators: William Muller, MD, PhD, Northwestern University; Daniel Remick, MD, Boston University

Association of Pathology Chairs 2016 Annual Meeting

July 12-15, 2016

Rancho Bernardo Inn – San Diego, California

Biobanking by pathology represents an opportunity to contribute to science by providing biospecimens that meet the highest quality standards and meeting ethical standards for collection. Pathology is the logical discipline to collect biospecimens since we understand what must be retained to ensure the correct clinical diagnosis and how to process tissue. This workshop will present information about how to budget to cover the costs of a biobank and provide an update about the proposed new rules. APC members will also share their individual approaches to biobanking successes and challenges.

2:30 pm – 3:00 pm Biobanking Budget and Business: Strengths, Weaknesses, Opportunities, and Constraints

Chris Andry, PhD, Boston University

3:00 pm – 3:30 pm Disruptive Influence on Research in Academic Pathology Departments: Informed Consent for Research Use of Biospecimens

Mark Sobel, MD, PhD, American Society for Investigative Pathology

3:30 pm – 3:45 pm Speakers Question and Answer

3:45 pm – 5:30 pm Biobanking Vignettes

3:45 pm – 3:55 pm GI Specimen Biobanking: Opportunities for Best Practices and Microbiota-Related Research

Technology Adoption: Breaking Down Barriers & Transforming Precision Medicine

Granada Room

[This is not a Continuing Medical Education activity]

External market forces continue to redefine where point-of-care is delivered, where slides are produced and where diagnoses are rendered, as well as defining who the customer is in the healthcare continuum. This presentation will briefly touch on historical experience, then delve into the changes that are happening to pathology and their resulting impact on operations. Discussion will include the impact of cloud and hand-held computing, as well as social media, that coincide with the maturation of this technology. We will conclude by making a business case and establish why the time is now to adopt digital pathology. Featured speaker: Keith Kaplan, MD, Corista

ANNUAL REVIEWS ✨ SPARK A CONNECTION

Annual Review of Pathology: Mechanisms of Disease

pathol.annualreviews.org • Volume 11 • May 2016

Co-Editors: **Abul K. Abbas**, *University of California, San Francisco*

Jon C. Aster, *Brigham and Women's Hospital*

Stephen J. Galli, *Stanford University School of Medicine*

The *Annual Review of Pathology: Mechanisms of Disease*, in publication since 2006, covers significant advances in our understanding of the initiation and progression of important human diseases. Emphasis is placed on current and evolving concepts of disease pathogenesis, molecular genetic and morphologic alterations associated with diseases, and clinical significance.

Access all Annual Reviews journals via your institution at www.annualreviews.org.

TABLE OF CONTENTS:

- *An Odyssey to Viral Pathogenesis*, Michael B.A. Oldstone
- *Chronic Traumatic Encephalopathy: The Neuropathological Legacy of Traumatic Brain Injury*, Jennifer Hay, Victoria E. Johnson, Douglas H. Smith, William Stewart
- *Cancer Stem Cells: Basic Concepts and Therapeutic Implications*, Dany Nassar, Cédric Blanpain
- *Hypoxia and Mucosal Inflammation*, Sean P. Colgan, Eric L. Campbell, Douglas J. Kominsky
- *Pathogenesis of Myeloproliferative Disorders*, Jyoti Nangalia, Jacob Grinfeld, Anthony R. Green
- *Genetics and Pathogenesis of Inflammatory Bowel Disease*, Ta-Chiang Liu, Thaddeus S. Stappenbeck
- *Origins of Bladder Cancer*, Bogdan Czerniak, Colin Dinney, David McConkey
- *Mechanisms of Disease: Pemphigus and Bullous Pemphigoid*, Christoph M. Hammers, John R. Stanley
- *Organoids as Models for Neoplastic Transformation*, James T. Neal, Calvin J. Kuo
- *Dendritic Spine Pathology in Neurodegenerative Diseases*, Jochen Herms, Mario M. Dorostkar
- *Disorders of Vascular Permeability*, Cindy Park-Windhol, Patricia A. D'Amore
- *Mechanisms and Consequences of Cancer Genome Instability: Lessons from Genome Sequencing Studies*, June-Koo Lee, Yoon-La Choi, Mijung Kwon, Peter J. Park
- *The Role of Surgical Pathology in Guiding Cancer Immunotherapy*, Scott B. Lovitch, Scott J. Rodig
- *Pathogenesis of Staphylococcus aureus Bloodstream Infections*, Lena Thomer, Olaf Schneewind, Dominique Missiakas
- *Mechanisms of Disease of Eosinophilic Esophagitis*, Benjamin P. Davis, Marc E. Rothenberg
- *Genetics of Cardiac Developmental Disorders: Cardiomyocyte Proliferation and Growth and Relevance to Heart Failure*, Lisa Wilsbacher, Elizabeth M. McNally
- *Obesity, Inflammation, and Cancer*, Tuo Deng, Christopher Lyon, Stephen Bergin, Michael A. Caligiuri, Willa Hsueh
- *Nonalcoholic Fatty Liver Disease: Pathogenesis and Disease Spectrum*, Timothy Hardy, Fiona Oakley, Quentin M. Anstee, Christopher P. Day
- *Glioma Genomics and Epigenomics: Arriving at the Start and Knowing it for the First Time*, Mariella G. Filbin, Mario L. Suvà
- *Bronchiectasis: Current Concepts in Pathogenesis, Immunology, and Microbiology*, Rosemary J. Boyton, Daniel M. Altmann
- *Hematopoietic Stem Cell Niche in Health and Disease*, Jonathan Hoggatt, Youmna Kfoury, David T. Scadden
- *Mechanisms of MicroRNAs in Atherosclerosis*, Andreas Schober, Christian Weber
